Ruby Developers (multiple positions)

**Company Description:**

The employer is a global digital media corporation that is venture-backed with offices in San Francisco, CA and Barcelona, Spain and is currently in the process of expanding to downtown Savannah, GA. The Company uses patent-approved technology to enhance the consumer experience with digital content including music and video. Ecosystem partners and customers include major music labels, mobile services providers and web 2.0 internet services companies such as social networks and online retail portals. The company is investing to expand the product suite to take advantage of significant growth opportunities and is looking for smart, creative and energetic employees.

*Equal Opportunity Employer*

**Job Responsibilities:**

Responsibilities of this role run the gamut from writing the core building blocks of a web-based media delivery system, managing encoding and rights-management, and developing the front-end experience for end-users. We anticipate large-scale volume and are looking for developers who have experience writing bullet-proof code that is built to last (e.g., highly scalable applications).

**Experience and Skills Desired:**

- 1+ years experience with Ruby and RAILS.  
Knowledge of building secure and scalable RAILS applications.
- Knowledge of HTML, JavaScript, MySQL and Apache.
- Familiarity with XML, RSS, and an understanding of applying transformations to data sets.
- Ability to work collaboratively in a shared code environment.
- Knowledge of Object Oriented design.
- Ajax, CSS, other front-end experience

**Optional Experience:**

- Experience with PHP and LAMP stack
- Experience with audio and/or video streaming.
- Strong Linux skills.
- Version control experience with SVN.
- Media publishing and management experience.
- Streaming media background, including rights management, trans coding, etc.
- Mobile content delivery experience.
- MySQL database design experience for large scale implementations, MySQL clustering experience.

**Education:**

Bachelor of Science degree or higher in computer science or equivalent.

**Compensation:**

We offer a competitive salary and benefits, plus opportunity for advancement.

**How to Apply:**

For prompt consideration, qualified candidates should send an e-mail with their resume, including salary history to [jobs@uplaya.com](mailto:jobs@uplaya.com).

**Job Type:**
